## **Banner launches 2009/2010 Green Guide at Procurement Solutions 2009**

The sixth edition of the Green Guide will be launched at the Procurement Solutions event, held at Earls Court on 9-10th June. The 2009/2010 Banner Green Guide focuses on sustainable procurement and features over a thousand environmentally preferred office products and services.

The new Green Guide showcases the disposal and recycling services available from Banner, including the company's new secure on-site shredding service. It is available via the Banner website at [www.banner-online.biz/greenguide](http://www.banner-online.biz/greenguide) and will be on display at stand I198.

Procurement Solutions is the UK's official government procurement event for the public sector and over 4,000 visitors are anticipated. The Banner team will be focusing on providing visitors with useful information to help them reduce their impact on the environment. In particular, they will be demonstrating the company's Green OPTIMISA™ system, which is designed to measure the environmental impacts of purchasing and identify key areas for improvement.

Banner will also be showcasing a number of its business services at the event. Visitors will be invited to tour one of the company's customised mobile shredding vehicles, incorporating a high capacity shredder, which has been specifically designed to ensure the secure on-site disposal of confidential data.

Finally, everyone who visits the Banner stand will have the opportunity to play the 'Green Game' for an opportunity to win a hamper of environmentally preferred products for the workplace.
